HOW MANY SEEDS DO YOU KNOW? CARD GAME

Instructions: Connect the names with the seeds and their possible uses

Why do scientists use scientific names? Scientific names are like a plant or animal's worldwide nickname. No matter where scientists live or what language they speak, they know exactly which living thing is being talked about.

While common names can change depending on places or languages, scientific names are always the same. Species scientific names are written in Latin and cursive.

Example: *Puma concolor* can be a 'puma', a 'mountain lion', or a 'cougar', ...
